Moving Data from Mas 90 and Great Plains to QuickBooks Enterprise 10.0

Level of Difficulty? Easy.

Prospective customers of QuickBooks Enterprise Solutions 10.0 are faced with the moving data dilemma. Fortunately, Intuit did an exceptional job at making the transition run as smoothly as possible. Discover how switching from other enterprise accounting platforms will be relatively straight forward.

How Difficult is to Transfer Data to QuickBooks Enterprise?

Over 10,000 businesses have successfully moved their data from other accounting platforms. Much emphasis should be placed on seeing that this task be done successfully, because migrating the data incorrectly would cost the company thousands more than what a typical consultant would charge to ensure a smooth transition process. Although Intuit intended to make their software to be as straightforward as possible, particularly with regard to data relocation, most businesses choose to solicit the aid of a third party provider to supervise the conversion from one accounting platform to another.

Transferring Data QuickBooks Enterprise from Sage MAS 90 Accounting Software

Numerous individuals contemplating transferring to QuickBooks Enterprise Solutions are presently employing Sage MAS 90 or another version of Sage MAS accounting software for their company's accounting functions. Luckily, the shift from MAS 90 to QuickBooks is a reasonably effortless one, if you know what you are doing. The other option would be to hire someone that knows what they are doing. Certified Pro Advisors face these types of projects on an almost daily basis. They are capable of managing transfers from QuickBooks from MAS90 in a more time efficient manner.

Doing anything for the first time is not easy, especially when it isn't the area that you specialize in it. Some companies try making their IT manager do the setup. This approach isn't the best course of action because now you're forcing someone that is already working on numerous projects to take time out of their day to work on something that they've probably never done before. Having a Pro Advisor already familiar with managing setups work on the data transfer would be the best strategy.

Transferring Data to QuickBooks Enterprise from Microsoft Great Plains Accounting Software

Like MAS 90, the practice of transferring to QuickBooks Enterprise from Great Plains can be an uncomplicated one if you manage it the right way. Again, the smartest and most secure way, which will guarantee the relocation of data is done properly, would be to solicit the assistance of an Intuit certified Pro Advisor. Handling conversion from Great Plains to QuickBooks Enterprise is done almost as frequently as MAS 90 changeovers.

Have an Enterprise Consultant Bring Added Value to Your Company!

Your accounting data is far too important to entrust anyone other than a certified professional. Certified Consultants in that field have been trained in all aspects of QuickBooks Enterprise and will offer their expertise to your firm for far less than it would cost to learn to do it yourself. In

addition to implementing a cost effective and easy to use system, they will get the job done faster. Having that degree of confidence that a professional is tackling the situation greatly reduces the tension and hardship coupled with adopting a different accounting platform.
